

Boston Alternative Energy Facility

Public Information Days

The proposed Boston Alternative Energy Facility is a **state of the art power-generation plant, generating 102MW* of renewable energy**, of which 80MW* will be exported to the National Grid and the rest will be used by the facility. The facility will process one million tonnes of refuse derived fuel (RDF – derived from non-recyclable household waste), generating enough power for more than 185,000 homes (equivalent to over 60% of the households in Lincolnshire).

As part of the Phase One consultation process five Public Information Days are being held to introduce the project, giving local communities the opportunity to come and find out more and share their feedback on the project.

Details of these events are below:

Venue	Date	Time
White Hart Hotel <i>1-5 High Street, Boston, PE21 8SH</i>	Friday 14 September 2018	2 – 8pm
St Nicholas Community Centre <i>Fishtoft Road, Skirbeck, PE21 0AA</i>	Saturday 15 September 2018	2 – 8pm
